

# AEC

Rebound's AgileEnergy Cool (AEC) brings energy storage and agile cooling to any HVAC load with lower costs and higher performance.

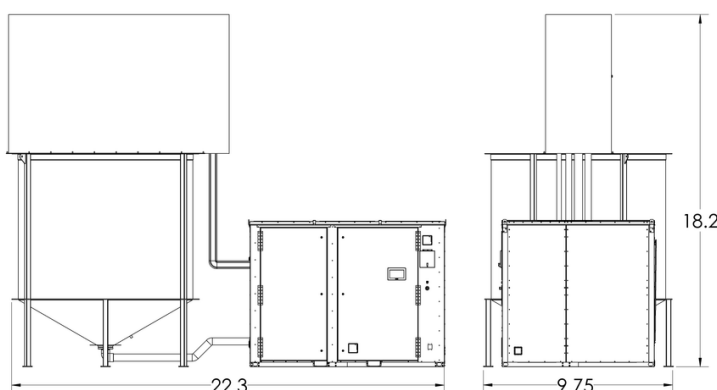

## Key Specs

|                  |                                       |
|------------------|---------------------------------------|
| Peak Cooling     | 150 TR                                |
| Storage Capacity | 150 TR-h, Higher capacities available |
| Footprint        | W 9.75' L 22.3' H 18.2'               |
| Connected Load   | 90 kW                                 |
| Dry Weight       | 8,500 LBS                             |

## Key Benefits

- Plug-and-play chilled water
- Lower project CapEx
- Reduced energy costs
- Higher facility reliability
- Lower connected load
- Enhanced dehumidification

## Decarbonization + Rapid ROI + Simple Install
